

Amateur Radio Licensing Class
Saturday March 1st and Saturday March 15th at
Meadowbrook Community Center

10517 35th Ave NE, Seattle, 98125

Amateur radio, or "ham" radio, is a licensed radio service and hobby that allows users access to a wide array of the radio-frequency spectrum for non-commercial purposes, including wireless experimentation; communicating with other radio hobbyists across the nation and across the world; and helping respond to emergencies. Amateur radio requires a license from the Federal Communications Commission, and training and support to use effectively. A free amateur radio class will be held on Saturday March 1st and Saturday March 15th at the Meadowbrook Community Center. The class will introduce participants to amateur radio practice, and prepare them to pass their license exam to be held at the conclusion of the class. The class is free. There is a test fee of \$15 to be collected by the exam team; FCC license fees are \$35, and collected at the time a license is issued. Participants may take the class without taking the license exam.
