

Zero Retries Hosts Inaugural Digital Communications Conference

Registration is OPEN!

Where: Edward Hansen Conference Center, Everett, Washington

Date: September 13, 2023

July 3, 2025

Amateur Radio Operators are gathering for the inaugural Zero Retries Digital Conference to foster and network with other HAMS regarding technological innovations in Amateur Radio. This gathering will bring together enthusiasts, experts, and newcomers to explore the latest advancements and share insights in the field of Amateur Radio.

Due to the pandemic, there has not been an in-person digital conference for several years. With GNU Radio hosting their conference at the same venue, Zero Retries seized the opportunity to bring back an in-person digital communications conference back to the Pacific Northwest. Planned presentations and demonstrations will be designed to enhance the skills and knowledge of the participants with topics such as but not limited to the

- IP400 Networking Project,
- M17 Digital Voice/Data system,
- MMDVM-TNC data system,
- AREDN, HAMWAN,
- Other Amateur Radio microwave networking.

Attendees will have the opportunity to connect with peers, and discover innovative technologies that are shaping the future of Amateur Radio. A call for papers has been sent, which will provide the opportunity to learn from leading experts.

ZRDC 2025 underscores the resilience and adaptability of the Amateur Radio community in the Pacific Northwest by embracing new platforms that continue fostering the passion for radio communication.

Registration for ZRDC 2025:
